-  **Tag Wrangler** by *PJ Eby* ♥ [66]

-
1. Easily generate dynamic content maps in your folder notes using waypoints. Enables folders to show up in the graph view and removes the need for messy tags! 
 2. Add underline (`<u>xxx</u>`) with shortcut, and `<center>xxx</center>`, `[[#xxx]]`, `[[#^xxx]]` 
 3. This is an Obsidian plugin to toggle between `lowercase` `UPPERCASE` and `Title Case` 
 4. A (companion) plugin to facilitate the extraction of text from images (OCR) and PDFs. 

5. Create a table of contents for a note. 
6. Surf the Net in Obsidian. 
7. Improved table navigation, formatting, manipulation, and formulas 
8. Create Buttons in your Obsidian notes to run commands, open links, and insert templates 
9. Calendar view of your daily notes 
10. Create and insert color palettes into your notes. 
11. Customize your workspace by adding commands everywhere, create Macros and supercharge your mobile toolbar. 
12. Generate a interactive heatmap graph to visualize and track your productivity 
13. Weave together data from diverse sources into different views. Inspired by Excel Spreadsheets and Notion.so. 
14. Complex data views for the data-obsessed. 
15. A day planner with clean UI and readable syntax 
16. Show syntax highlighting in code blocks the editor 
17. The Obsidian Editing Toolbar is modified from cmenu, which provides more powerful customization settings and has many built-in editing commands to be a MS Word-like toolbar editing experience. 
18. An Obsidian plugin that allows hiding files and folders in the built-in file explorer 
19. Transform the Page Preview hover popover into a fully working editor instance 
20. A browser-like search tab for your local files. 
21. Click a folder node to show a note describing the folder. 
22. Hide UI elements such as tooltips, status, titlebar and more 
23. Plain text accounting 
24. Create simple callouts in lists. 
25. This Plugin provides a simple Editor for Markdown, HTML and Colors and in addition a command interface. The command interface facilitate a faster workflow. 

26. MetaEdit helps you manage your metadata. 
27. Change the colors, fonts and features of Minimal Theme. 
28. Perform file explorer operations (and see your current file path) from the title bar, using the mouse or keyboard 
29. Know when installed plugins have updates and evaluate the risk of upgrading 
30. Create/manage your daily, weekly, and monthly notes 
31. Paste URL "into" selected text. 
32. An implementation of party.js for Obsidian. Create confetti, sparkles and even custom effects in your notes! 
33. A search engine that just works 
34. Quickly add new pages or content to your vault. 
35. Globally search settings in Obsidian.md 
36. Offers controls for adjusting theme, plugin, and snippet CSS variables. 
37. Converts quotes to curly quotes, dashes to em dashes, and periods to ellipses 
38. Add hotkeys to insert specific templates 
39. Provides a calendar and a timeline of the notes creation and modification 
40. This plugin returns the current weather from OpenWeather in a configurable string format. 
41. Automatically search and insert citations from a Zotero library 
42. Reminder plugin for Obsidian. This plugin adds feature to manage TODOs with reminder. 
43. Find links to similar notes using artificial intelligence from OpenAI. 
44. Finds what you are looking for in the selected text and replaces it with the specified text 
45. Restore and delete files from the Obsidian .trash folder 
46. Adds Properties to multiple notes at once. Either right-click a folder, or select multiple notes and right-click the selection. 
47. Find and replace text using regular expressions. 

48. Slurps webpages and saves them as clean, uncluttered Markdown. 
49. Advanced modes for Obsidian URI 
50. Ensures each note occupies only one tab. If a note is already open, its existing tab will be focussed instead of opening the same file in the current tab. 
51. The most Obsidian-native PDF annotation tool ever. 
52. Lets you rearrange and hide specific status bar elements. 
53. A plugin to preview notes as Markmap mind maps 
54. Update your Discord Status to show your friends what you are working on in Obsidian. With Discord Rich Presence. 
55. Chat View enables you to create elegant Chat UIs in your Obsidian markdown files. It also supports the WebVTT format. 
56. This is an ePub reader plugin for Obsidian. Can open document with ".epub" file extension. 
57. Add icons to anything you desire in Obsidian, including files, folders, and text. 
58. Navigate between sequential daily notes with ease. 
59. Supercharge your canvas experience! Create presentations, flowcharts and more! 
60. Carry over incomplete todos from Daily Notes grouped by headers, with support for nesting and flexible todo states. 
61. Creates an embeddable gallery based on selected page contents. 
62. Open a specified note, canvas, or workspace on startup, or set it for quick access later. 
63. Adds a nice completion sound when a checkbox is ticked-off 
64. Create tabs in your notes. 
65. Share the enabled plugins in list/table format. 
66. Rename, merge, toggle, and search tags from the tag pane
